Strangeness polarization in semi-inclusive and exclusive Lambda production.
27-31 October, 2008

MAIN TOPICS

- 1) Strangeness polarization and nucleon structure: Ideas and current status
- 2) Semi-inclusive Lambda production in e-p: Experimental status, QCD analysis, phenomenology of distribution/fragmentation functions
- 3) Lambda polarization in pp: Experimental status, reaction models, phenomenology
- 4) Target fragmentation in semi-inclusive DIS: Theory (QCD factorization, fracture functions), phenomenology, experimental status and prospects
- 5) Exclusive Lambda production: Theory, phenomenology of N → Lambda GPDs, experimental prospects (JLab 12 GeV)
- 6) Lambda production in p-p/pbar at LHC, FAIR and JPARC
- 7) Target fragmentation and exclusive measurements with a future ep collider (EIC)
